

**If you already have a ring**

Print this page on an A4 sheet and place one of your rings on top of one of the circles. When the circle and the internal diameter of your ring coincide, you will have found the right size!

**If you want to wear a single ring**

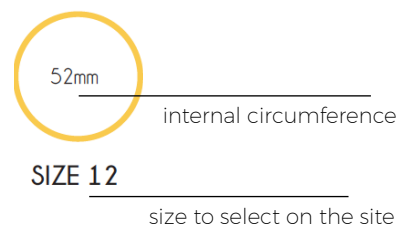

Use a sample that is similar to what you are about to buy: your size may vary depending on the height of the ring.

**If you want to wear multiple rings on the same finger**

Remember to buy rings of a larger size than yours.

1. Get a ring that fits perfectly
2. Place the ring on the circles below, the edge yellow must be in the inner perimeter of the ring
3. If you're unsure which to choose, choose the larger one

Check if your printout is correct, the scale measures exactly 50 mm.

We can't guarantee that the size measurement through this format is correct. We recommend that you get help from your trusted jeweller.
